

Science:

Our topic for this half term is: Light (Year 6 unit of work)

L.O. for this week: To investigate the colour spectrum

Watch the Powerpoint and check out the activities on the Doves homework page.

When you have made your own colour spectrum wheel, I'd love to see it in action!

Maths: (see separate plan)

Ratio and Proportion problem solving
End of Unit assessment

English:

L.O: to write a non-chronological report

Create your own creature—it could be the one you designed at school—and produce a non-chronological report like the one you did last week on the yellow-spotted lizard. Use the planning sheet to help you.

Use your imagination and have some fun!

Art:

Architecture: Observational drawing

This week's lesson follows on from last week's lesson.

See separate plan.

PE:

It is important that we exercise regularly to keep ourselves fit and healthy! As you have got some time at home, you have the opportunity to do some different exercise to what we would do in school! Can you play football in your garden? Can you design and make an obstacle course in your house? Could you follow some yoga / dance on the internet? Try to do something active everyday – and remember to write down what you did so you can share it with us once we're back at school! Fancy something different this week—what about some dancing? Check out Oti Mabuse's Kids Dance Classes on Youtube.

Year 6

Week commencing Monday

30th March 2020

RE: Christianity:

L.O: To explore Christian festivals and symbols

Do festivals and symbols show that Christianity is still a strong religion?
Can you find out about some Christian festivals and why they are celebrated? And some symbols that represent a Christian faith eg a cross...?

PSHE

This half term we have been focusing on 'Healthy Me'

This week we are looking at strategies for managing stress. For many people the current situation across the world is stressful; not being able to go out, or see your friends and family etc.

You are going to create a poster called 'Healthy, Happy Me, focussing on all the ways we can keep our mind and body healthy. Send them to me and I will publish them for you all to share as a way to keep you healthy in these strange times.

It's holiday time!

- Keep a diary
- Read a book
- Write a poem
- Write a letter to a friend or relative
- Take some photos
- Bake a cake
- Play some games
- Relax and enjoy!

Happy Easter to you all! It will certainly be different from usual for us all.
